#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 13 January 2005.  
 2a) This action is FINAL.                    2b) This action is non-final.

## DETAILED ACTION

Applicant's response to the restriction requirement of December 13, 2004 is acknowledged. The applicant has stated that all claims are readable on species I. However the prior restriction requirement is withdrawn. A new restriction requirement is noted below.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 12/1-4, and 13/12/1-4 drawn to a recording apparatus comprising a pivotable cover and a holding rib formed in the cover, classified in class 400, subclass 645.4.
- II. Claims 5-11, 12/5-11, and 13/12/5-11, drawn to a recording apparatus including a tray container and a rail member, classified in class 347, subclass 104.
- III. Claims 14-17, drawn to a recording apparatus comprising a delivery roller and engaging means, classified in class 400, subclass 645.

Inventions I and II are related as subcombination and combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

particulars of the subcombination as claimed because the specification of the holding rib formed at the cover is absent from the combination claims. The subcombination has separate utility such as in a recording apparatus that includes pivotable output trays rather than retractable trays guided by rails.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as in a recording apparatus that includes a stationary or translational output trays rather than a pivotable output tray. See MPEP § 806.05(d).

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the specification of the engaging means is absent from the combination claims. The subcombination has separate utility such as in a recording apparatus that includes pivotable output trays rather than retractable trays guided by rails.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's representative on March 07, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
